

# Fuel for Thought

## Easter Bunny at QER

The Easter bunny has successfully delivered and assembled our \$1m Retort Feed Test Unit ('RFTU'). It's no chocolate egg, but we are nonetheless excited to see it arrive. In fact Jason, our Senior Mechanical Engineer, is a bit like a kid in a chocolate shop.

**Bruce Andersen**  
Site Superintendent,  
QER

The equipment, which has been fabricated and assembled right here in Gladstone by local firm Xtreme Engineering, and other local contractors, will be completed and commissioned by QER over the next few months. It will be used to demonstrate an innovative design for the top part of our plant, where the rock

**Partially completed assembly of QER's retort feed test unit (RFTU).**

is fed in. The new design will further enhance the energy efficiency and oil yield of our future commercial plant. We'll keep you in the loop as the trials progress.

No doubt, as always, a lot of Gladstonites will be travelling over the next couple of weeks. From all of us at QER we hope you and your family have a safe, enjoyable and relaxing Easter Break.
